Comments about **Bangerz** - Miley Cyrus

Leceri

Looking to buy or trade for a copy. You can look at my collection & hopefully we can work at a deal. Message me please

Jube

#00107 here - sounds great - i play it at my vinyl shows alot :)

BlessChild

Mine says 01901, fantastic sound quality! ! ! !

just one girl

Not sure how it stacks up to the picture disc edition, but this pressing is surprisingly good.

Justie

They both sound great, I will say the picture disc plays louder than the colored.

Error parents

I agree with you. I have the picture disc edition and it's heavy and the sound quality is pretty perfect. All songs with good bass.

MOQ

Pink version is 150g while the Picture disc is said to be 180g. Not sure if that makes a difference.

Yozshunris

The sound quality of the picture disc is also very, very good. I actually find the picture disc to have a deeper and warmer sound than this release.

Jonariara

The picture disc pressing is actually quite good as well (really deep bass, clear sound)!

RED

My copy says 1881. In it's defense, it does sound great.

misery

...how is it possible that this release is limited to 1300 copies but the copy shown in the images above is numbered 1489?

Gio

It's also possible that there are 1300 of these but the numbering is not sequential after a bad batch, etc.

Xtintisha

My copy is #1863 so it's unlikely that this is limited to 1300 - having said that, it does seem to be pretty limited.

Wizer

Not to make this more confusing, but my US copy is numbered 220.

Tane

All good explanations, and it could easily be an innocent mistake. This is a very good, color pressing. I have no complaints, and I'm not even close to a flipper. That said, this was just one of a few albums at 2017 RSD that seemed to press more copies than originally published. A trend I hope does not continue.

Vivaral

My RSD version is #33, so numbering to include picture discs doesn't hold up.

Damdyagab

Like rendezvous said, this was also available in other countries for RSD (I know AUS got it for sure!), so maybe that explains it? Also, another theory is they started the numbering from the amount pressed/sold as picture discs? Probably not the case but just a possibility... ˘(□)˘

Perdana

My guess is they pressed more originally and 1300 was the number of them that turned out okay enough to sell (maybe some of the discs or packaging got messed up at the plant). 1300 is a weird pressing number for a RSD Miley Cyrus reissue. I bet it was originally at least /2000.

JoJoshura

1300 for the US and maybe more for the rest of the world!
