Comments about **Money \$hot** - Puscifer

Kazijora

The reviews are correct: this is one noisy album, but it's spotty. It's not utter garbage like Tool's Lateralus, but it's up there. Even after a clean, stylus clean, and storage in anti-static sleeves, it still pops. No hisses, that I can tell, but the popping can make or break your experience. It breaks mine as it's Puscifer's best album. Buy if you're a collector, not if you want to listen. I bought to listen, probably won't listen again. But I want the entire Maynard discography, so it has the collector draw.

Camper

Did you mean to post this as a response to my comments on Mer de Noms?

PanshyR

I had a mispressed Side B which caused a lot of noise on that side. This was pressed by Rainbo who are really hit and miss. No hyperbole here and I'm using a pretty high end system and do all the things you mentioned including vacuuming my records on a VPI record cleaning machine. I'm suprised you find the record sounds distorted though, which shouldn't be normal. On the other hand, my Puscifer Money Shot was pretty quiet so go figure....

Majin

One of my worst "sealed" experiences. Vinyls full of scuffs, shape/flat imperfections & badly warped! Shame to those guys who still are not professionals! This crappy shit looks like a bootleg (even bootlegs are better) with many visual imperfections & the most ugly is the WARPED VINYLs. If you want this record tell to your seller to open & check it before shipping!

Bad Sunny

Their best so far, (and Conditions Of My Parole was already a 10/10!)

Jia

Is this somehow different from the other submission on here, other than the fact it is signed by Maynard? If it is not a different pressing in any way, and is just a copy that is signed by MJK, then this is a duplicate entry which, that should just be in your own notes.

Kea

Great job on the color choice for the signature from Maynard too! /sIt's done in silver on the guys shirt and totally blends in!

Nakora

I know, I agree. You can barely see it. He should've signed it on the red table.

Mullador

Anyone else have terrible surface noise issues with their copy? My copy came in the mail today with

very bad visible scuffing, I assume from being jostled in shipping and the crappy paper inners they put these discs in. I'm quite upset about it because I love this album.

Painwind

Likewise, really bad surface noise throughout. Super disappointed, also disappointed in myself for not listening to it until now...

Thabel

Same issue here. Records are relatively flat and there aren't many hairlines, but damn this thing crackles! Even after cleaning. The grooves also look weird, lots of small holes and dimples. Very disappointed!

komandante

Same here. A piece of shit. 50 BUCKS GONE AWAY....Puscifer Entertainment where did you cut these copies? You said it! MONEY SHOT....or money's hot???

Oparae

yes, i have exchanged two times already. noisy as hell. loud pops that won't clean away. filthy, scuffed up discs. very disappointed in the quality of the last couple Puscifer releases. awesome album, though...

Malanim

i had the same issue!!! i did return my copy

Freighton

I had the exact same issue. Very noisy and scuffs on both LPs.

Questanthr

Mine sounds great! I did get a copy of the last album that had been scratched by pieces of vinyl left over from printing and they send me a new copy!

Thordigda

My copy sounds great, no scuffs or noise issues. Chris Bellman in the deadwax too!

Mr_Jeñson

I haven't listened to mine yet, but I'll throw it on and let you know.
